

## Tropics Software Technologies Announces Release of Policy Standard Version 3.2

**Sarasota, Florida, April 6, 2006** – Tropics Software Technologies (TST) announces the release of Policy Standard Version 3.2 today, which includes several technical and functional enhancements. The free upgrade, which is part of TST's commitment to its clients for continual upgrade and maintenance of Tropics software, is now available to all Policy Standard Version 3.1 clients. The version joins the other Tropics workers' compensation insurance software – Tropics Policy Enterprise Administration system, Tropics Claims Administration system and WebTropics.

With this release, TST is providing over 30 free enhancements to its clients. One of the most important enhancements, the reengineered rating module, makes insurance rating easier for companies operating in multiple states. Additionally, TST is providing the following optional features with this release:

- Online payroll entry which allows self-billing policyholders to enter payroll online and pay their invoices online
- Automatic email notification for policy termination, invoices and payment reminders
- Automatic posting of policies in PDF format to agency and policyholder web pages upon creation or endorsement to any policy.

Tropics Software Technologies President/CEO Mike Mobar said he is proud of the company's product maintenance and enhancement process which actively engages users to create the most valuable workers' comp products available. "This release is a testament to the strong communications between Tropics and our clients as well as the innovativeness of the Tropics team which is always striving for product excellence."

### About Tropics Software Technologies

Tropics Software Technologies is a national software company specializing in workers' compensation
